## ThinkVision E27q-20
Enrich Every Workday

CLASS, COMFORT, AND CLARITY DELIVERED

A desktop monitor is an important device for most modern office goers, freelancers, work-from-home staffers, and emerging creatives. This workforce demands quality display output where high resolution, color accuracy, and ergonomics are vital to working comfortably and efficiently wherever they are. ThinkVision E27q-20 comes equipped with a QHD panel, rated for 99% sRGB, built ergonomically, and is a smart choice that is within reach of most small businesses and freelance creatives like photographers and designers.

FEATURES OF THINKVISION E27q-20 MONITOR

Outstanding Picture Clarity

Purposefully-designed, the E27q brings users precisely what is needed. With 1.77 times more pixels than FHD, the QHD display offers more details to users working on spreadsheets and datasets, so every dot and dash are clear. The In-Plane Switching panel delivers wide viewing angles, and there is no fade-out when seen from either side. The display covers 99% of the sRGB color gamut, so even entry-level creatives can get accurate color when editing images and videos. 3-side NearEdgeless bezels look modern and aid in creating seamless multi-monitor setups.

Inherent Utilitarian Convenience

The E27q comes loaded with features that maximize productivity for professionals. Mounting options for selected ThinkCentre Tiny and Nano PCs with a VESA bracket make it possible to reduce desktop clutter by placing them directly on the monitor. Multiple ports offer flexibility—HDMI is a well-rounded option for carrying video and sound, while DP is the port of choice for creatives. An Audio Out jack and built-in speakers make meetings and media consumption engaging.

Prioritizing User Comfort

Work from home or the office is physically comfortable for E27q users. Its ergonomic stand offers the flexibility for a full range of motion in the lift, tilt, pivot, and -360°/ 360° swivel axes and lets users create a setup that suits them. The display panel also comes with Low Blue Light technology that blocks harmful blue light radiation without compromising color output. Moreover, it comes with TÜV Rheinland Flicker Free, Eyesafe certification and TÜV Rheinland Eye Comfort certifications for maximized eye protection. Together, this is a monitor that is excellent to use, day or night.
