

WORKPLACE EFFICIENCY SOLUTIONS

Lenovo's IT Automation solutions focus on aligning IT with user's needs for maximum efficiency.

SOLUTION SETS:

- | WORKPLACE OPTIMIZATION
- | DOWNTIME REDUCTION
- | IT AUTOMATION

IT AUTOMATION SOLUTION DATASHEET

Ver. 1.0

With automation implemented strategically, IT can provide a competitive advantage to their organization in this digital economy. By being cost-efficient and providing better service quality, IT increases the ability to respond faster to the business.

5 reasons why Lenovo is a difference maker

Trusted around the world

Expertise across categories

Confidence in our products

Business-boosting technology

Flexible support network

Powered by Intel®.
Intel Inside®.
Powerful Productivity Outside.

HASSLE-FREE IT TEAMS

- Automatically run diagnostics, and if needed, get connected with Lenovo Support
- Easily install critical and recommended updates through user-friendly diagnostics and support
- Free up IT support by automatically running diagnostic tests
- Increase the lifespan of the battery by setting the maximum charge value to below 100%– for users who primarily use their computers with the AC adapter
- Optimize cooling fan settings for quietness or performance

AUTOMATE ROUTINE TASKS

Completing business processes manually is mundane and often time-consuming. Take the step to automate routine tasks and ease the IT team's work load.

With the right technology, IT teams can remotely run software updates, device diagnostics, and repair a system without physically sending someone.

Lenovo Vantage – The built-in IT specialist on Think PCs

Lenovo Vantage is a new application that replaces Companion and many other Lenovo apps by combining their functions and adding new features so that users can easily protect and customize their PCs automatically.

Several automation features reduce the breadth of routine and mundane tasks that an IT department has to perform.

Lenovo systems running Windows 10 will automatically receive Lenovo Vantage as an update, and it will be the only Lenovo branded app preloaded on newer systems.

NO MORE DEPLOYMENT DELAYS

- Auto-configure devices in the manufacturing stage to speed up the deployment process
- Customize user set-up experiences with Windows AutoPilot
- Tailor BIOS settings at the manufacturing stage for the needs of the organization

SPEED UP DEPLOYMENT

With automation implemented strategically, IT teams can eliminate the hassle associated with deploying new PCs.

Lenovo's Factory Services* allow you to leverage Lenovo's manufacturing capabilities to tailor systems to their unique specifications, increasing consistency and reducing the time required to deploy new systems.

Custom preloads

Lenovo has the ability to offer standard preloads to customized images. One of the newest customized preloads, Ready to Provision Plus (RTP+), allows adding up to any five apps on the image.

Basic provisioning with Lenovo ADS and Windows AutoPilot

Lenovo devices can be enabled to support Windows AutoPilot to help speed up the process of deploying and configuring new devices. Basic registration through AutoPilot for Microsoft suite of products together with the Lenovo Advanced Deployment Service (ADS) provides the ability to customize deployment. This eliminates the need for IT to perform imaging tasks and automates the out-of-box experience for business imaging.

Full provisioning with key EMM partnerships

The global strategic partnership of Lenovo and MobileIron EMM ensures secure provisioning and simplifies endpoint device management. It incorporates identity, context, and privacy enforcement to set the appropriate level of access to business data and services. MobileIron secures data-at-rest on the mobile device, in mobile apps, desktop and in Cloud storage. Additionally, the MobileIron EMM platform secures data-in-motion as it moves between the corporate network, devices, and various on-premise and Cloud storage repositories.

Image storage and recovery with Lenovo Cloud Deploy

Lenovo Cloud Deploy solutions provide the optimal restore, deploy, and recover experience with the ability to store images in Cloud and have access to it, anywhere, anytime.

*on CTO models only

RELIABLE, INTELLIGENT TECHNOLOGY

- Easily transfer your files and settings from your old PC to your new one with Lenovo Migration Assistant
- Update software and drivers or connect with customer support all from one location without incurring additional costs
- Intelligent cooling and sensing systems in our devices ensure a lower failure rate

REDUCE IT COSTS

Deploying self-service options to users for the most commonly performed support tasks can enable businesses to focus on delivering higher IT service-level performance with the right infrastructure.

Lenovo helps lower the cost of IT infrastructure on which the business applications depend, thereby reducing overall costs for organizations.

Lenovo Vantage – Leverage built-in capabilities of Think PCs

Lenovo Vantage unclutters the PC experience and makes it easier for customers to get the most out of their Lenovo devices. It reduces the cost incurred in procuring resources for system updates and upgrades to prevent any cost due to human error or unwanted attacks.

Its features include:

- **System Update:** check for new software and driver updates for your computer.
- **WiFi Security:** detects and analyzes, in real-time, any threats or attacks that are present in the vicinity of the laptop and enables it to distinguish between legitimate networks and risky, possibly malicious networks.
- **Customization:** get helpful information and recommendations based on your device and the way you use it.

Think Deployment Resources – Tap into our expertise for free

The Think Deployment Resource Center on Lenovo.com is a portal to provide content and documentation for customers who are performing their own operating system deployments of Lenovo business products. The resources are aimed at making this process as fast and as easy as possible.

- **Deployment Recipe Cards:** an ideal starting point when beginning the development of a custom image on a new Lenovo ThinkPad, ThinkCentre or ThinkStation.
- **SCCM Driver Packs:** provides the fastest, easiest way to add the hardware drivers you need for your deployment.
- **Deployment Engineer Resources:** find white papers, tools and links to useful reference materials for the deployment process.
- **Community Tools:** includes a Driver Grabber and Driver and Software Matrix for admins.
