

Lenovo Go Accessory Central

With the successful launch of the Lenovo Go product range, users can now overcome the pitfalls of remote work, such as juggling multiple devices, battling with power availability, and poor audio quality while on the move.

Although these devices are unquestionably superior to their predecessors, managing them would be a chore without the right tools. To make this experience as effortless and convenient as possible, we created Lenovo Go Accessory Central.

The free-to-download software is a one-stop hub where users can manage their Lenovo Go input and audio accessories on the fly in one place. Inside this intuitive interface, users can customize and personalize the functionality of their devices, complete firmware updates, and much more.

How does Lenovo Go Accessory Central help manage your devices?

Many Devices. One Hub.

Instead of each device having its own software and management interface, Lenovo Go Accessory Central allows users to connect & manage Lenovo Go devices inside one helpful hub.

Your Device. Your Choice.

Lenovo Go Accessory Central understands that everyone is different and gives you the freedom to personalize your devices in many ways, including calling shortcuts, mouse sensitivity, Bluetooth® settings, audio profiles, and more.

Firmware. Made Easy.

Keeping your devices up-to-date has never been easier with lists of connected devices, firmware reports, and easy automatic updates. You'll even get instant access to new customization options as they're released.

Make The World Your Office.

For remote workers to be as productive as their office-bound predecessors, they need devices that can mold to their environment & preferences. Lenovo Go Accessory Central solves this challenge by giving you the power to personalize your Lenovo Go experience on the fly.

Lenovo Go Wireless Multi-Device Mouse & USB-C Wireless Mouse

When paired with Lenovo Go Accessory Central, users can modify traditional aspects of their mouse, such as DPI. They'll also be able to select from pre-defined functions with Mouse Mode and control their Teams experience with Call Mode.

Lenovo Go Wireless Vertical Mouse

With 3 programmable buttons (2 side & 1 middle) to personalize, the Lenovo Go Wireless Vertical Mouse is a perfect work companion. Dynamic profiles can be created to set custom bindings for specific apps that are automatically loaded when the app launches.

Lenovo Go Wireless ANC Headset

The Wireless ANC Headset has the same core features as the wired version with added Bluetooth® pairing functionality. Inside Lenovo Go Accessory Central, you can enable pairing mode, unpair devices, and delete saved connections.

Lenovo Go Wired ANC Headset

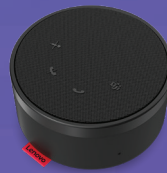

Lenovo Go Accessory Central allows you to choose the audio experience that's right for you. With settings including Audio Guidance, Flip to Mute, ANC Modes & Talk Through Mode, you can select whether the headset talks to you, whether you want to hear external sounds, preload audio profiles, and much more.

Lenovo Go USB-C ANC In-Ear Headphones

Lenovo Go Accessory Central adds easy personalization to the Lenovo Go USB-C ANC In-Ear Headphones, including enabling or disabling voice prompts, choosing audio profiles, and configuring noise-canceling.

Lenovo Go Wired Speakerphone

Lenovo Go Wired Speakerphone owners will have three areas of customization inside Lenovo Go Accessory Central. The first being voice prompt profiles, the second audio profiles, and the third volume control wheel sensitivity presets (normal & high).

Lenovo Go Unified Pairing Receiver

USB-A

USB-C

Lenovo Go Accessory Central makes managing the devices connected to your Lenovo Go Unified Pairing Receiver a breeze. With up to 8 devices listed by name in the Pair/Unpair Tab, you can connect or disconnect them any time you please.

Lenovo Go Bluetooth® Audio Receiver

Included with every Lenovo Go Bluetooth® Audio device is a Lenovo Go Bluetooth® Audio Receiver, which can pair with supported devices. With Lenovo Go Accessory Central, you can manage connected devices, pair, unpair, and delete saved connections.
