Modern Education - Bridging the digital divide

Modern education increasingly depends on smart communication and collaboration technology to bridge the gap between physical classrooms and online learning experiences.

These blended environments enable more flexibility and inclusivity for students who are not able to attend in person, and for those who prefer to attend remotely.

However, access to technology varies wildly between students across different social and economic backgrounds. Failure to deliver smart communication and collaboration technology to all students will widen a digital divide that is already impacting attainment levels.

At Lenovo, we work closely with educators to provide equitable learning environments and address education continuity. Our specialised learning technology is affordable, flexible, and secure and works for all students, teachers and staff.

20%

of districts are adopting, planning, or considering a hybrid approach in the future.

61%

of enterprise malware encounters were in education, the most in any sector.

70%

of parents and teachers believe that digital skills gained during the pandemic will aid children in their future careers.

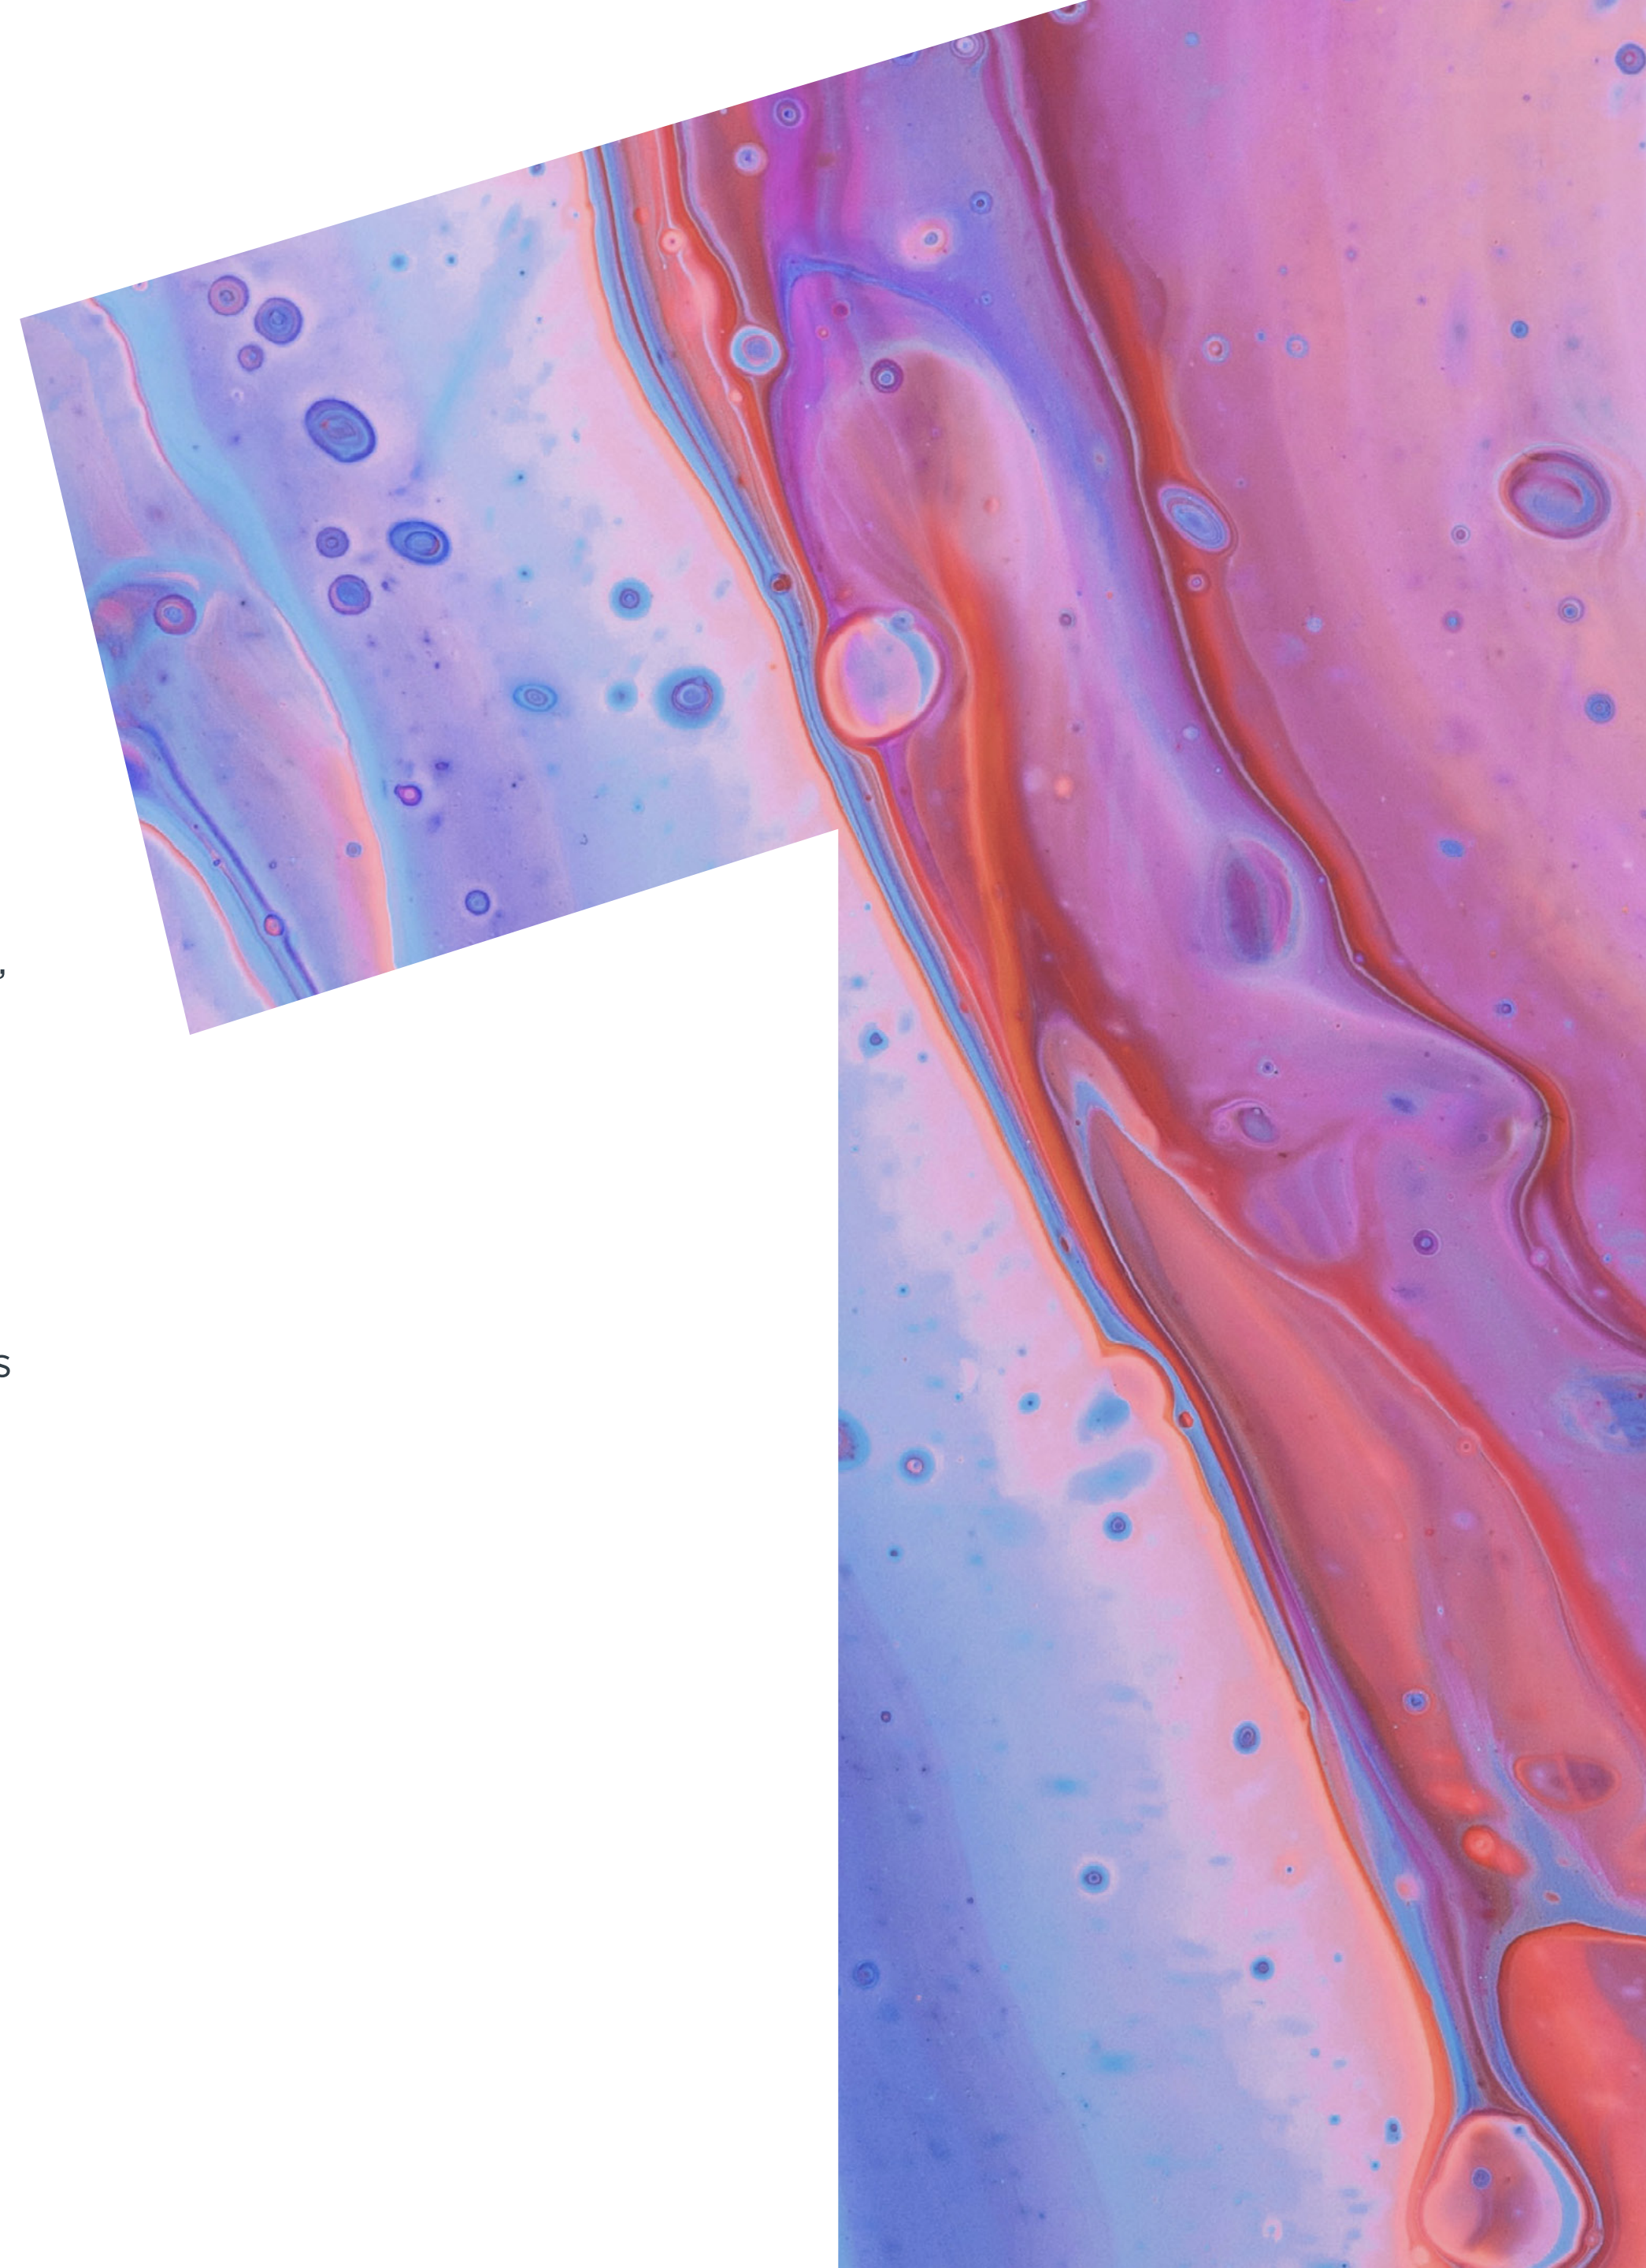

Build a school without walls

Disruption to learning at this key stage can have long-lasting consequences.

But with the right technology in the right place, students of all backgrounds and abilities get a consistent and enriching learning experience - from anywhere - equipping them with the digital skills they need to thrive in the modern world of work.

Lenovo's hybrid classroom solutions bridge accessibility gaps, increase collaboration across environments and ensure that teachers can give students the support and attention they deserve. With no pupil left behind.

Lenovo innovates with Microsoft to bring the hybrid classroom to life

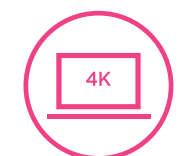

Lenovo Hybrid Classroom with Microsoft Teams Rooms

Collaborative learning: Classmates can connect, collaborate, and create from anywhere in real time.

Personalised learning: Engaging one-on-one learning experiences in connected classrooms.

Flexible learning: Benefit from a portfolio of software solutions to better enable distance and blended learning.

Integrated solution kits transform your classroom

Lenovo provides ready-made solution kits that can easily transform any physical space into a connected, hybrid classroom. These kits are supported by reliable hardware, software and services which enable seamless collaboration and convenient, end-to-end solution management.

- Teachers will be **empowered to build student engagement** in distance-learning and hybrid-learning scenarios
- Receive a full range of communication platforms and advanced hardware to accommodate video conference lessons with **smart cameras, sound bars, and classroom microphones**
- Move around the classroom to communicate lessons with a dynamic learning environment that **advanced video conference systems** offer

Lenovo ThinkSmart™ Solution

Scalable, configurable and complete modular room solutions

Kit options

- ThinkSmart Core + Controller kit
- ThinkSmart Core Full Room kit (includes ThinkSmart Cam and ThinkSmart Bar XL)

Scalability

- Scalable from small huddle rooms to large conference rooms and auditoriums with integrated mics and speakers

Benefits:

- Streamlined
- Convenient
- Immersive
- Manageable
- Secure

LanSchool

With LanSchool, teachers can guide digital learning and promote collaboration in the classroom and beyond.

Lessons are broadcast to each student's screen, ensuring that everyone is on the same page.

Teachers remain in control of the content that can be accessed and can message individual students or entire groups throughout lessons.

LanSchool works with Microsoft Teams for engaging and synchronised learning from anywhere, on any device.

Partner with us to inspire and empower the future of learning

Empower solutions for improved outcomes

Our technology and solutions give schools everything they need to create a collaborative, innovative place to learn, through our devices, software, services and industry partnerships.

Inspire simple, safe learning everywhere

Your students and teachers need consistent, safe experiences from anywhere. And for almost three decades, Lenovo has led the way in mobile computing and connectivity – in the classroom and at home.

Accelerate the future of education

Today's learning must support tomorrow's leaders. Lenovo technology is built to meet diverse and changing needs – with consistent innovation and a clear return on investment. Our solutions are forward-looking, focusing on soft skills and teacher development.

Why choose Lenovo for Education?

We're the number one education technology partner

Our technology and solutions give schools everything they need to create a collaborative, innovative place to learn.

We know mobility matters

Your students and teachers need consistent experiences from anywhere. And for almost three decades, Lenovo has led the way in mobile computing and connectivity - in the classroom and at home.

Our tech is built for an evolving environment

Today's learning must support tomorrow's leaders. Lenovo technology is built to meet diverse and changing needs - with consistent innovation and a clear return on investment.

We're much more than devices

We're more than a technology provider. We're your partner. Our vast education technology experience is at your disposal, helping you navigate obstacles and seize new opportunities.

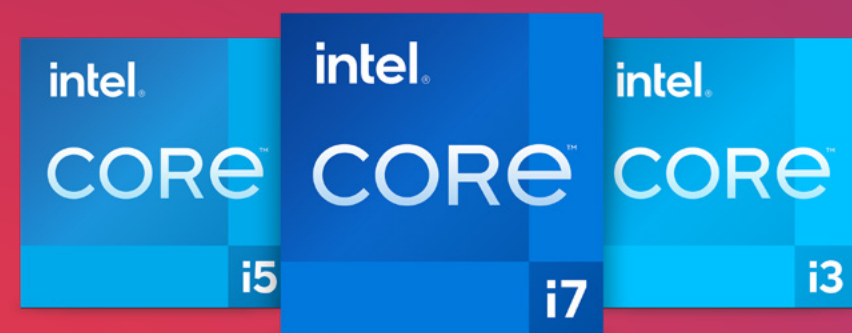

Security comes as standard

ThinkShield security is built in at the component level, covering security audits of our entire supply chain, tamper-detecting packaging and secure recycling. That's security across the entire lifecycle.
