

A person wearing a blue and white checkered shirt is sitting at a wooden table, working on a laptop. A second monitor is attached to the laptop, displaying a 3D architectural rendering of a building. The laptop screen shows a presentation slide titled 'SOLAR PANELS' with a green background and a sun icon. A black pen and a brown paper coffee cup with a black lid are on the table. The background is a bright, out-of-focus outdoor setting.

Lenovo

The next normal is here

As the world adapts to what can be considered the “next normal,” businesses and employees are still navigating through new expectations for a **healthy work-life balance** that doesn’t sacrifice wellness or efficiency.

The freedom to work where and how you want is a commodity not all employees are ready to give up just yet. With hybrid working models here to stay, **ThinkVision Mobile Monitors** offer a portable display solution to extend your screen real estate, support productivity and **release your creativity** wherever you go.

Made for on-the-go work

Powerful connectivity and productivity

Inspire creativity

Prioritize self-care with ergonomic design

Sustainable technology for a greener world

Success in remote and hybrid work

The coronavirus pandemic accelerated the growth of remote and hybrid work, and although parts of the workforce are gradually returning to the office, the sentiment remains that **flexibility is what employees want and need.**

More than 80% of workers expect their employers to continue supporting remote work¹

25% of all jobs* will be remote in 2022²

52% of employees are considering going hybrid or remote in the year ahead³

56% of workers prefer a hybrid working model⁴

81% of executive leaders believe hybrid work will be the foremost working model by 2024⁵

55% of businesses globally offer some capacity for remote work⁶

Challenges outside of the office

While flexible and hybrid working offer a better work-life balance in a time when mental health and wellbeing are increasingly prioritized, employees face a number of challenges when working outside of the traditional office space:

The three biggest challenges associated with remote work: ¹

 25% of employees say their company is 'very prepared' for hybrid work²

 23% of employees are concerned about not having suitable tech for hybrid work³

 13 hours per day remote workers spend staring at screens⁴

 63% of remote employees lack an additional display to enable them to work comfortably⁵

5 - techrepublic

An increasingly mobile workforce

The mobile workforce, part of a broader global deskless workforce, is comprised of people who are on the move and may work at multiple locations in a single day.

More and more industries are relying on a mobile workforce to deliver services and products outside of the office.

Mobile devices empower employees by allowing them to work whenever and wherever they need¹

1.87 billion

The global mobile workforce is set to increase to 1.87 billion by 2022, which is about 42.5% of the global workforce²

73% of people use smartphones for work³

80% of the global workforce is now deskless⁴

By 2030, 75% of the workforce* will be millennials⁴

³ - Techradar

⁴ - Skedulo

Seven challenges for the mobile workforce

Time and tide wait for no one – and the **change in the workplace** is already here. But employees now face new challenges that hinder productivity and creativity.

Eye strain over long hours of work

Carrying **multiple, heavy devices** and adaptors to serve different functions

No tools to promote **creativity** and **precision through touch**

Limited desktop space at home or when working remotely

Getting all devices **powered** and functioning simultaneously

Complex setup hinders connectivity with multiple devices

Limited viewing space makes it difficult to multitask

Clunky setups, tangled cables, and outdated monitors are counter-productive and can negatively impact long-term health and efficiency, as well as limit the ability to be creative on-the-go.

Secrets to successful work on-the-go

Investing in a portable monitor can take your work from anywhere productivity to new heights. The mobile monitor market will maintain a 35% growth rate, according to the 2023 OMDIA History Forecast 4Q21 Pivot.¹

Advantages of Portable Monitors²

-  Easy set up
-  Mobility/transportability
-  Work productively and expandability
-  More viewing space
-  Cost-effective
-  Safe and secure application
-  Power saving

¹ - OMDIA History Forecast 4Q21 Pivot
² - Technipick

Tapping into the power of USB-C one cable solution technology is another game changer that remote and hybrid workers should get on board with.

Advantages of the USB Type-C one-cable solution:

-  Reduced cable complexity
-  Universal compatibility
-  Simplified power supply
-  Connect more easily
-  Provide in-built audio
-  Carry more data
-  Future-proof

Powerful connectivity and productivity

ThinkVision M Series monitors are built with innovative **dual USB-C design** to give users advanced connectivity and powerful tools for productivity.

¹ When the monitor is connected with an AC/DC adapter, being charged

² Screen extension function available when ThinkVision Mobile Monitors are connected with a compatible USB-C laptop or when the smartphone's OS supports

Connect seamlessly with not only the Lenovo Think family laptops but also other compatible brands of notebooks and smartphones.

 **All mobile monitors come with** dual USB Type-C ports for power, data, and media transfer

 **Innovative power pass-through** capability to supply power to the monitor **and the compatible USB-C device connected, simultaneously via one AC/DC adapter¹**

 **Seamlessly duplicate or extend your screen—** be it your smartphone or laptop²

Inspire creativity

ThinkVision Mobile Monitors give creators **full control of both the canvas and the brush** — to bring their inspirations and visions to life.

Crystal clear display

- ✦ Up to **2.2K high resolution**, IPS panel display for crisp, accurate visuals*
- ✦ **Two options for screen size** (14" & 15.6")
- ✦ 16:10 & 16:9 Aspect Ratio
- ✦ Brightness of up to 300 nits
- ✦ Up to 100% Color Gamut*
- ✦ Glossy touch screen or anti-glare display*

Deliver only as you can

- ✦ Intuitive 10-point touchscreen interface*
- ✦ Active digital pen with 4096 levels of pressure – unleash the freedom to design, animate, present, sketch, or annotate with precision*
- ✦ On-screen-display (OSD) Menu

Seamless viewing experience

- ✦ Auto-rotation gravity sensors to view any content seamlessly*

*Certain features and specifications may vary based on different models of ThinkVision Mobile Monitors

Prioritize self-care and an easy user experience

ThinkVision Mobile Monitors offer unmatched user comfort and ergonomic design that **prioritize user health**.

Eye care technology

Advanced eyecare technology certified with **Natural Low Blue Light technology** reduces blue light emission **without color distortion**, to minimize eye strain and maximize comfort over long hours of usage.

Height adjustable foot and stand

The monitor comes with the option to tilt the screen **between up to -5° and 90°**, and height adjustment up to 11mm – so you can get the **perfect viewing angle**.

The perfect desktop addition

VESA Mount makes it possible to place the device on **virtually any surface**, including a wall or a desk.

Software meets hardware

ThinkVision Mobile Monitors are compatible with **new ThinkColour display software** to bring an enhanced and optimized user experience that boosts productivity and efficiency.

Wide range of compatibility

ThinkVision Mobile Monitors are also **compatible with a wide range of devices** and systems including PCs and smartphones.

Promise for a Greener World

From Jan. 2019 to 2021, **18,756 tons** of recycled plastics were used in manufacturing ThinkVision Monitors.

From Jan. 2015 to 2021, **61,532,354 monitors** containing recycled plastics were shipped.

85% 

We support the circular economy by expanding the use of post-consumer recycled content and using closed loop materials sourced from end-of-life information technology equipment (ITE) and products.

A select scope of monitors are made of **85% post-consumer recycled content (PCC)** ABS by weight.

100%  

To help end users **build a healthy indoor environment** is considered our responsibility. That's why we make sure **100% of our products** are certified with **UL GREENGUARD GOLD**, the highest industry standard for reducing the emissions of **harmful airborne chemicals (VOCs), cadmium, mercury and arsenic.**

Vision for a sustainable future

Lenovo is a pioneer in Environmental, Social, and Corporate Governance (ESG) and is **dedicated to creating a greener, more sustainable world.**

ThinkVision M Series Mobile Monitor has been designed and developed with the same approach in mind and is certified with up to **EPEAT Gold level and are TCO Certified®**. To help end users build a healthy indoor environment, ThinkVision Mobile Monitors are **UL GREENGUARD** certified and built using recyclable, and human-friendly materials that are mercury-, arsenic- and Cd-free. The USB-C cable in-the-box is also **PVC free**.

Even the packaging is made with sustainability in mind, **by using up to 100% PCC paper or pulp cushion to help support the environment.** The M Series utilizes a **space-saving packaging design** that helps reduce overall carbon emissions while its upgraded packaging presents an enhanced unboxing experience.

*Some certifications may vary depending on model

Make flexible work, work for you

Remote industry specialists

ThinkVision M15

Lightened, enlightened, extended productivity. **Lighten the load doing business on the road.**

Make productivity portable with ThinkVision M15. Its stunning form factor is meticulously designed to expand and match the screen real estate of multiple kinds of laptops. This light and slim 15.6-inch FHD resolution mobile monitor weighs just 860g¹ while its head measures a mere 6 mm thick, making it perfect for multi-screen multi-tasking like spreadsheets in an airport lounge or sharing a presentation with a prospect in a restaurant.

Equipped with two identical USB Type-C² ports, the monitor gives users indispensable Power Pass-Through capability. That means they can power both the monitor and the laptop with a single power adapter, up to 65W³, plugged into one port with a USB Type-C² cable connected to the computer from the other port. Or they can simply power M15 from the laptop using just one USB Type-C² connection.

With safety ever in ThinkVision's minds, the M15 mobile monitor also comes equipped with TÜV Rheinland certified Low Blue Light technology, which protects users from eyestrain caused by certain frequencies of blue light. Simply turn it on with the press of a button.

Features of ThinkVision M15 monitor

Lighter. Slimmer. Winner.

M15 does the heavy lifting of your productivity in a surprisingly light package. Just 860g¹ and measuring no more than 6 mm through its head, this considerably crafted mobile monitor doubles users' screen space with a 15.6-inch, In-Plane Switching panel, FHD display, the perfect resolution for a monitor of its size. With expanded screen real estate, work such as comparing detailed spreadsheets is made so much easier, multitasking is a breeze and colleagues or salespeople can mirror or extend their screen to give prospective clients a presentation on their own screen, face to face, even in public spaces. Thanks to M15's integrated, fold-out stand with height adjustment, the monitor will raise up to align with a laptop for the most seamless user experience.

Stay in charge with Power Pass-Through

M15 handles power with elegance and simplicity. Its true one-cable design solution means it can run off a single USB Type-C² cable that delivers images, audio and data, as well as power, to the monitor from a connected laptop for supreme convenience on the road. But add to that its second, identical USB Type C² port and its invaluable Power Pass-Through function allows both the monitor and the laptop to be charged from a single USB Type-C² power plug. On top of enjoying this convenient design for power, users can also connect flash disks, earphones or other compatible USB Type-C² devices through the monitor's second USB Type-C² port when it's not in use.

XS size, XL UX

Taking M15 on the road may mean more hours of operation. With that in mind, it's thoughtfully designed to care for users' eyes by protecting them from eye fatigue and strain caused by harmful, high-energy blue-wavelength light. This is done with TÜV Rheinland Low Blue Light certified technology that can be switched on in an instant and left on for as long as users choose. Thought has even been given to the unboxing experience, with newly designed, easy-opening packaging that takes just seconds to have the monitor in users' hands. To keep its already modest weight down, M15's protective sleeve is lightweight, modern and elegant. And it even mounts to the wall by a VESA 100 mm fixture for a more stable solution when users spend time in the office.

ThinkVision M14

Portable USB-C monitor. Crafted for improved productivity.

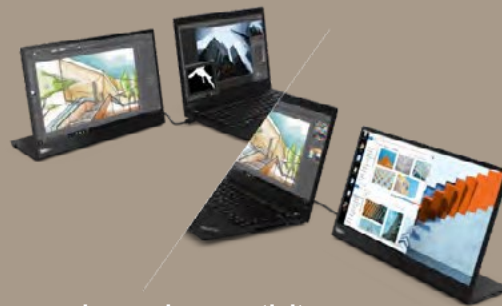

The ThinkVision M14 is an ultra-slim and ultra-light mobile monitor. Its 14-inch screen helps you extend your workspace comfortably no matter where work takes you. Compatible with notebooks of any screen size that come with an advanced USB Type-C port*, the ThinkVision M14 can either extend or duplicate your notebook display with one plug. The USB Type-C ports on either side allow both left- and right-handed users to work efficiently, and the ergonomic design enhances user experience. Packed with impressive portability, connectivity, and flexibility features, the ThinkVision M14 is ideal for mobile productivity.

Features of ThinkVision M14 monitor

Achieve targets on the go

The ThinkVision M14 boosts productivity with its thin and light form factor. Weighing 598g¹, this 4.4mm sleek mobile monitor enables easy portability. The stylish design with a Full-HD, IPS display provides vivid lifelike visuals, ensuring you never miss out on any detail. With a brightness of 300 nits, the ThinkVision M14 offers a stunning visual experience while consuming content online.

Experience advanced connectivity

Two innovative USB Type-C ports on either side of the monitor make connectivity effortless. These ports support both power and video delivery simultaneously from a single port. The ThinkVision M14 also offers a 'power pass-through' design that powers the mobile monitor by an adapter and charges the notebook at the same time. This feature is suitable for smartphones or notebooks with one USB Type-C port^{**}. The ambidextrous design of this monitor enhances user comfort.

Work the way you like

The ThinkVision M14 with its admirable flexibility is built for varied job roles. With a tilt angle of -5°~90°, you can position your monitor in a way that suits your style. Compare content with ease even as you use laptops of different screen sizes with the ergonomic height adjustable foot. Also, you can wall mount your monitor effortlessly with mounting support for a hands-free viewing experience. The advanced low blue light technology minimizes eye strain, making extended working hours easy.

ThinkVision M14t

Portable with a touch of inspiration.

Scale new heights of productivity, flexibility, and style with a touch-enabled mobile monitor. The slim and light ThinkVision M14t is a 14-inch Full-HD display that provides you with an extra screen whenever you need it. With 10-point touch functionality, enjoy the freedom to design, animate, present, and annotate on an intuitive monitor interface. More than just a display, the M14t comes with a pressure-sensitive active pen for precise sketching and easy navigation, as well as a customized sleeve and an L-shaped dongle for vertical deployment and better cable management. This compact USB-C Hub monitor with two USB-C ports works seamlessly with Lenovo Think family laptops as well as other compatible USB-C devices, like your smartphone. Connect, present, pitch, and create with conviction on the M14t – at the office or on the go.

Features of ThinkVision M14t monitor

See more everywhere you go

Built for mobile professionals, the M14t's 14-inch Full-HD IPS panel display with super-narrow bezels ensures crisp and accurate visuals with impressive viewing angles. This sleek ultra-portable monitor with tilt function (-5°/ 90°) and height adjustment stand (up to 11 mm) allows users to work in a comfortable position. With 300 nits brightness and TÜV Rheinland Low Blue Light technology, you can work with minimal eyestrain.

Deliver as only you can

Drag, draw, annotate, and collaborate, no matter where you are. The ThinkVision M14t is 10-point touch-enabled and comes with an active digital pen that supports 4096 levels of pressure, so you can draw and sketch with unmatched precision. Switch your view in no time with auto-rotation sensors and access an intuitive on-screen-display (OSD) menu to make easy adjustments to settings.

Connect better, work easier

Built with an intuitive dual USB-C design, the M14t can duplicate or extend your screen so you're always productive. With data, power, and media capabilities of USB-C, you can create presentations, transfer data, and enjoy the power pass-through function simultaneously to supply power to the M14t and a compatible USB-C device connected to the monitor via one AC/DC adapter*.

ThinkVision M14d

Stunning visual performance. The light and portable mobile monitor for those going places.

Today's professionals want to make the most of their time – whether you are traveling, waiting at airport lounges, meeting clients in hotel lobbies, making presentations, or closing a big deal, you live life on the go. And ThinkVision M14d Mobile Monitor is a brilliant solution to your long-felt need. With the ThinkVision M14d Mobile Monitor, you actually have a fully functional and practical second screen that hooks up to your notebook easily. The ThinkVision M14d Mobile Monitor, with its super-slim and light form factor, is designed to make even complicated data work easy, on the go. Its 14-inch screen, 16:10 aspect ratio (compared with traditional 16:9 aspect ratio, 14-inch screen is adding the 5.64% active area), 104 PPI (an increase in 19.9% pixels than FHD screen), 2240 x 1400 resolution screen with 100% sRGB color gamut and 105% sRGB color space ensures rich, clear imagery and true-to-life colors. This mobile monitor comes with two Type-C¹ ports for quick upstream and downstream connectivity, allowing you to connect your notebook effortlessly. In addition, the Type-C¹ ports have the 'power pass-through' feature that allows you to power the monitor and charge your notebook simultaneously. The mobile monitor also has the Natural Low Blue Light technology which reduces the harmful blue light to make viewing a comfortable and stress-free experience without color distortion. ThinkVision M14d – the slim and smart monitor that makes you more productive, even when you are on the move.

Features of ThinkVision M14d monitor

The all-out visual performer

The ThinkVision M14d Mobile Monitor has a 2.2K, 104 PPI, 2240 x 1400 resolution screen with IPS panel that offers excellent, sharp performance, and superb visibility from wide viewing angles. Its 16:10 aspect ratio and its 'mirror and extend' feature means that it is perfectly aligned with the viewing format of your 16:10 notebook. This mobile monitor comes with a 100% sRGB color gamut and 105% sRGB color space which is consistent with notebooks and displays rich, true-to-life colors. No wonder it adapts easily to your mobile lifestyle and gives your personal productivity a big boost.

Power pass-through for extra convenience

The ThinkVision M14d Mobile Monitor will delight you with its connectivity and convenience. This monitor comes with 2 x USB Type-C¹ ports with up to 65W power pass-through. This unique feature means you can power your ThinkVision M14d Mobile Monitor and charge your notebook simultaneously while keeping your desk clutter-free. Now, you don't have to worry about charging multiple devices. Just charge your notebook and connect your mobile monitor for uninterrupted performance.

Portable & comfortable

Weighing in at less than 600 grams², this slim, lightweight, ultra-portable monitor's 14-inch screen is just 4.6 mm thick, making it very easy to carry. The ThinkVision M14d Mobile Monitor also comes with Natural Low Blue Light technology that protects your eyes from harmful blue light enables you to have a strain-free viewing experience without color distortion. Even when you are viewing it for long hours. Its Mount feature helps you adjust the monitor for enhanced ergonomics and comfort. In addition, the ThinkVision M14d comes with a height adjustment support feature that further enhances the user experience.
