

3 priority solutions for the future of tech in government

State and local governments can take advantage of tech trends to increase collaboration between agencies, boost engagement in workers, and strengthen security.

Focus on security resilience.

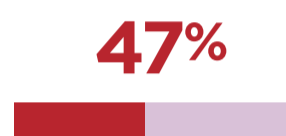

95% of state and local government officials surveyed say long-term resilience and risk protection are important, with **55%** saying risk avoidance is an opportunity for alignment and unity between governments.¹

Embrace the possibilities for collaboration.

57% of state and local government officials surveyed said the greatest opportunity for collaboration lies in technology that aggregates data across multiple sources.¹

Taking advantage of that opportunity is crucial — **47%** of all IT leaders surveyed believe collaboration tools have improved overall productivity and efficiency.²

Improve the employee experience.

69% of state and local government human resources professionals say more employees are quitting.³

Overall, **84%** of workers say work-from-home options have improved their job satisfaction.²

Smarter tech. Smarter services. Smarter governance.

Lenovo devices combine real-world responsiveness with iron-clad security and optimized performance with ThinkShield, Windows 11 Pro and Intel vPro® Enterprise, an Intel® Evo™ Design.
