for all**

**Lenovo**

Lenovo TruScale with RISE for SAP, private edition, customer data center option helps customers in their cloud transformation journey to becoming intelligent enterprises.

Get on the path to cloud readiness with a secure and privately managed service that accelerates growth through innovation.

The customer data center option with TruScale offers the merits of an operating expense business model, elastic computing, and white-glove managed services.

## Simple, seamless and scalable architecture

Successful business strategies require enterprise insights of your corporate data. Lenovo TruScale for RISE with SAP, private edition, customer data center option provides the speed, scalability, and system availability that are key to helping your organization align and integrate processes, automate tasks, and deliver exceptional customer experiences.

Available only through SAP, the customer data center option delivers a turnkey, OPEX, cloud subscription on Lenovo servers and storage that are SAP HANA certified and supported.

Achieve cloud-like economics with agile on-premise SAP solutions.

Enjoy support through the cloud transformation and run SAP landscapes in a secure and reliable environment.

Reduce up-front investment and align costs with business outcomes.

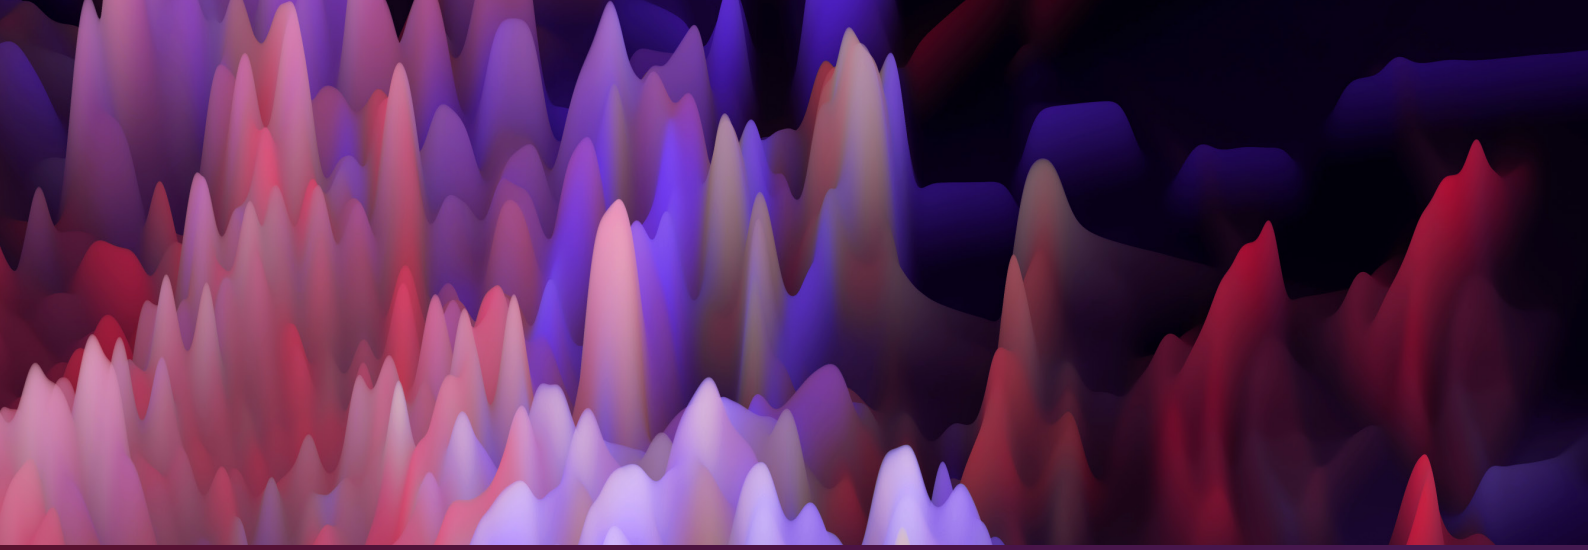

Benefit from the merits of an OPEX business model and concierge managed service.

Gain insights faster with real-time input and analysis of mission-critical data assets.

Get data sovereignty, specific industry compliance, a low risk tolerance and meet specific company policies.

The customer data center option is one of SAP's private managed cloud deployment options that helps customers to accelerate the adoption of SAP S/4HANA along with a suite of other SAP products. Now businesses can have customer data center option managed and run in Lenovo infrastructure environments.

### Choose this solution if you are looking for:

1

#### OPEX model

**Lenovo TruScale for RISE with SAP, private edition, customer data center option** delivers a cloud-like on-premise SAP solution. Combined with Lenovo TruScale's pay-as-you-go utilization-based model, the solution eliminates the upfront capital expenditures of a classic on-premises Infrastructure.

2

#### Assured security and compliance

**Lenovo TruScale for RISE with SAP, private edition, customer data center option** allows business-critical data to remain on site, behind company firewalls, ideal for regulated industries and enabling compliance with data privacy laws.

3

#### Reduced risk

**Lenovo TruScale for RISE with SAP, private edition, customer data center option** helps you eliminate the cost and complexity of SAP application entanglement with third-party and roll-your-own applications by simplifying the interoperability without leaving your infrastructure environment.

4

#### Better performance

Avoid the challenge of separating the SAP S/4HANA application from the data residing in the data center. With Lenovo TruScale, customers do not need to move their SAP workloads, they can secure the merits of a modern, OPEX billed cloud-like infrastructure.

# Bringing the Cloud to you with a solid infrastructure

## OPEX model. Better performance. Assured security and compliance.

Available only through SAP, customer data center option delivers a turnkey, OPEX, cloud subscription on Lenovo servers and storage that are SAP HANA certified and supported. It is less disruptive to operations versus a move to a public cloud provider and offers the merits of elastic computing, monitored and managed by Lenovo and SAP white-glove services.

Lenovo TruScale for RISE with SAP, private edition, customer data center option provides the speed, scalability, and system availability that are key to helping your organization align and integrate processes, automate tasks, and deliver exceptional customer experiences.

Enable your intelligent enterprise to do exponentially more with less.

And, for organizations that are looking for the fastest, most efficient way to maximize the value, leverage the efficiencies and asset longevity with Lenovo Asset Recovery Services to adopt sustainable IT practices and make the most of your IT budget.
