

Where your hybrid workforce goes, engagement follows

Unlock opportunity for all with fit-for-purpose collaboration solutions

Collaboration is essential for keeping hybrid teams connected, productive, and innovative — it also creates a sense of belonging. Effective, meaningful collaboration hinges on the right technology.

Recognizing this, 44% of organizations are planning to invest in hybrid collaboration tools.¹ But digital collaboration and meeting experiences are often lacking, impacting productivity and morale.

For hybrid work to succeed, employees' experience must remain seamless and consistent no matter where, when, or how they work. Each employee should have access to the same quality of collaboration, including Wi-Fi, audiovisuals, and feature-rich communications platform.

47%
of IT leaders:

Collaboration tools have improved overall productivity and efficiency.¹

Lenovo

Tapping into talent everywhere

Nearly 85% of IT leaders and 78% of employees say collaboration powered by technology has unlocked opportunities to recruit and retain a more diverse workforce and skill sets.¹

Multiple perspectives make for a richer work experience, with decisions and innovation informed by broader thinking.

Lenovo collaboration solutions are designed for technology-enabled hybrid work, offering both human and business outcomes — including relief for overburdened and under-resourced IT teams managing a dispersed workforce.

CUSTOMER STORY

Transforming local government

Southwark Council is a London-area local government organization that provides a long list of public services to its citizens. With budgets falling and citizen expectations on the rise, the council is always looking for ways to optimize operations.

Recognizing more could be done to empower its 4,500 employees, the organization built a vision of the ideal work environment — one that liberated employees from fixed desks, but at the same time increased efficiency and promoted collaboration. This change would allow better use of existing space and streamline building facilities.

The council chose Lenovo technology as the ideal foundation for this workplace transformation because of its versatility, reliability, ease of use, and cost-effectiveness. Following a proof of concept, they selected portable, lightweight Lenovo ThinkPad laptops with great battery life.

Today, Southwark Council employees can work effectively whenever, wherever, and however it suits them, enabling greater productivity and higher satisfaction.

“We’ve converted even the most skeptical of our employees to support remote working by giving everyone the tools to do it effectively,” said Darryl Durno, Head of Technology Transformation. “Over time, we expect that this transformation will enhance the life-work balance for our staff while enabling them to provide higher service quality for citizens.”
