

## Lenovo Cloud Solutions for Microsoft 365

# Get serious about **security**

As we navigate the new Work From Anywhere era, the rise of remote work has propelled the business world into new ways of collaboration and communication. But, with this transition to new ways of working, we've also seen the rise of new and **increased cyber threats**. In fact, in the past twelve months, **66% of Small and Mid-Market Businesses around the globe have reported an attack.**<sup>1</sup>

On the surface, this can be frightening. But, with Lenovo Cloud Solutions for M365 your business can take a proactive approach towards these threats, staying compliant and up-to-date with the latest security and privacy trends, while simultaneously keeping your **employees, devices, and data protected**.

Smarter  
technology  
for all

Lenovo

94%

of SMBs report increased security benefits after moving to the cloud <sup>2</sup>

68%

of IT professionals list cloud-enabled security as the most valuable training topic <sup>3</sup>

45%

of businesses list security as the top benefit of using the cloud <sup>4</sup>

24%

of users state protection against data loss is the biggest advantage of cloud services <sup>5</sup>

## Enterprise-grade security, enabled by default.

With **Microsoft 365 through Lenovo**, we keep you proactively and automatically compliant and up to date with the latest security and privacy regulations. Plus, apps like Outlook have **integrated features to protect against cyberattacks**, like phishing. And, with OneDrive and SharePoint, you'll get automatically enabled enterprise-grade **security for data, files, and folders**, keeping your end users working securely, both on and off site, without additional investment into on-premises security.

## Cloud services that actually manage your security.

Just because the workday is over doesn't mean that hackers are taking a break. Security breaches can happen at any time, leaving your business, your employees, and the livelihood of your business at risk. Lenovo Cloud Solutions for M365 gives you an **extra layer of protection with services** that make an **actual difference**:

- Ensure all your users have the right permissions to share files and folders securely.
- Get help enabling multi-factor authentication, enhancing the protection of your cloud.
- Optimal privacy and security configuration in apps such as Teams, Outlook, and other Office apps.
- 24/7 support for issue resolution, helping your team be productive at any location, in any device, while maintaining the safety and security of your data.

## Security embedded into every device. Now that's **smarter**.

There's an entire world of cyber threats out there. Don't wait to secure your business and enhance your protection portfolio.
