Forward-thinking security

Learning should take place in a secure environment for students and faculty. We bring together a sophisticated suite of partner applications. ThinkShield — our comprehensive portfolio of end-to-end security tools — protects hardware, software, services, and processes.

These protections complement the security features on Lenovo devices running Windows 11 and powered by the Intel vPro® platform.

You'll get even more system security for your students and your school with Intel® Threat Detection Technology — a multilayered, hardware-based security solution that helps stop ransomware, cryptomining, and even memory scanning attacks before they happen using advanced AI threat detection.
