Lenovo

1

Improved response times start with call centers

Performance and reliability are must-haves in the call center. Operators depend on continuous and uninterrupted communications to relay vital information between constituents, responders heading to the scene, and staff supporting the responders.

Lenovo

Smarter justice

Increasing caseloads, heavier use of digital evidence, and limitations on remote collaboration are forcing the judicial system to seek more efficient data management, video processing, and communication capabilities. Digital transformation — combined with rigorous security and the support of experts who understand the challenges facing government IT — is about to make judicial IT smarter.

Smarter transportation

Keeping citizens moving safely and efficiently is a 24/7/365 challenge for municipal governments. Whether it's public or private modes of transportation, officials are managing ever-increasing amounts of data to analyze patterns, spot trends, solve problems, and plan for future needs. This kind of analysis needs robust, scalable technology to empower transportation employees and inspire the next generation of transportation solutions.
