NetFilter

LANSCHOOL

A shared commitment to safer digital learning

Lenovo NetFilter provides cloud-based AI-driven web filtering and threat protection to help keep students safer from digital dangers. By upgrading to Lenovo NetFilter+, schools can also receive real-time keystroke alerts and identify when intervention is needed. To celebrate the launch of these new safety solutions, Lenovo is offering a special promotion.

**Save up to 85% on
LanSchool when
bundled with Lenovo
NetFilter solutions.**

Lenovo NetFilter

Lenovo NetFilter is a new filter and safety solution built with students and educators in mind. Lenovo NetFilter provides powerful, real-time protection through robust features designed to work in the classroom and remotely.

AI-driven

Dynamically categorize unknown domains and keep the internet filter current.

Compliant

Compliant with data privacy and other regulations required by CIPA, COPPA, IWF, Friendly Wi-Fi, and others.

Customized filtering

Block access for specific groups or users based on lists of URLs, keywords, file types, and apps.

Easy mass deployment

Manage one or multiple schools through a single dashboard.

Built-in reporting

Documentation is easy with customizable logging, reporting, and analytics.

Protect mixed environments

Compatible with Mac, Windows, and Chromebooks on the school network or remotely.

Multilingual support

Filtering categorization is available in over 40 languages with 10 interface language options.

Threat detection

Protect school networks against other digital dangers, including malware, phishing, and viruses.

Lenovo NetFilter+

Upgrade to Lenovo NetFilter+ to receive real-time keystroke alerts for digital dangers, including cyberbullying, threats of violence, and suicidal ideation. Scheduled, customizable reporting and screen captures give admins insight into how to better protect students.

LANSCHOOL

For over 30 years, LanSchool has been placing purposeful technology in the hands of passionate educators. This powerful software guides learning, promotes collaboration, and maximizes teaching time.

Screen monitoring

Quickly view student monitors to provide additional support and guide learning.

Blank screen

Shift classroom attention by blanking student screens and locking their devices.

Messaging

Simplify communication, increase engagement, and shift focus with messaging features.

Raise hand

Give students confidence to ask for additional help with the digital raise hand feature.

Share screen

Share teacher screens across all devices to capture the attention of students.

Push website

Save valuable teaching time by instantly launching the same website on every device.

Limit web

Help students focus by limiting access to approved websites or disabling internet use.

Battery status

Reduce classroom disruptions and inconvenient shutdowns with battery status tracking.
