

# Power What's Next in Retail with Lenovo OEM Solutions

Bring ultimate shopping experiences to life with Lenovo and Intel.

Lenovo OEM Solutions, built with up to 12th Gen Intel® Core™ processors, empower brands around the world to revolutionize retail. Powering everything from kiosks and menu boards to intelligent shelving and interactive shopping, Lenovo solutions are built to boost efficiency, connectivity, and control to deliver unforgettable experiences.

## Immersive Displays

Customer engagement begins with **Instorescreen™ inTELLIGENCE smart retail solutions**, powered by Lenovo Edge computing. With **InDaisy+ Daisy Chain**, brands can control multiple Instorescreen™ displays from a single computer, such as the **Lenovo ThinkStation P360 Ultra Workstation**, powered by 12th Gen Intel® Core™ processors. Add a **Lenovo ThinkVision monitor** for a vibrant control experience.

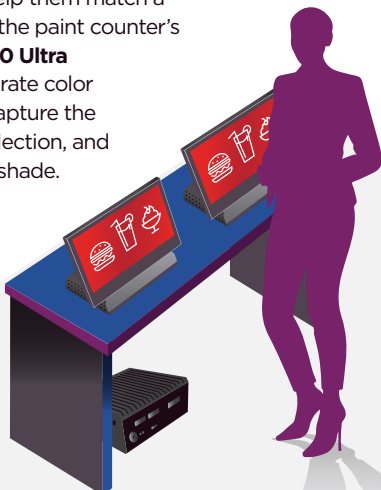

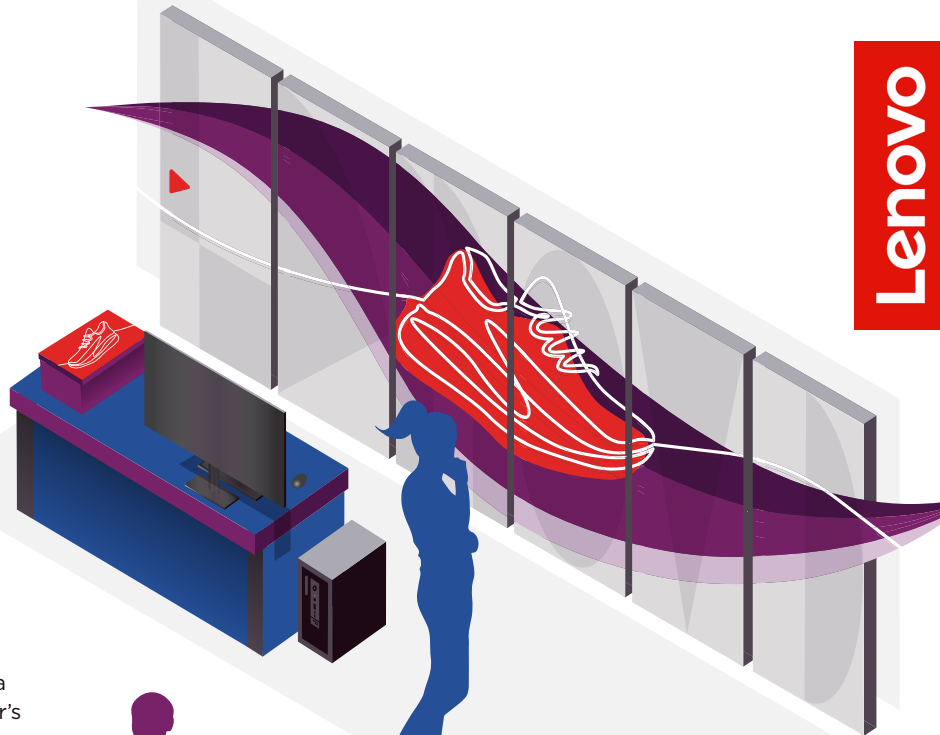

## Interactive Solutions

Hardware store customers can trust the crisp, colorful display of a **Lenovo ThinkVision monitor** to help them match a specific paint color, while the paint counter's **Lenovo ThinkStation P360 Ultra Workstation** powers accurate color scanning technology to capture the color data, process the selection, and pour and mix the perfect shade.

## Self-Serve Kiosks

**Lenovo's ThinkEdge SE50**, powered by Intel® Core™ i5 or i7 vPro® processors, helps quick-service restaurants streamline order placement and fulfillment. When this raw computing power is paired with **Instorescreen™ inTOUCH monitors** and **KASTUS screen protectors**, the result is a durable, elegant display that truly stands out.

Lenovo

## Let's Revolutionize Retail

Lenovo OEM Solutions have unlimited retail applications that extend far beyond these brief examples. **Connect with us** to talk about how you can bring ultimate shopping experiences to life and develop valuable customer relationships that last with Lenovo OEM Solutions.
