

# Inspiring the future of medical and scientific innovation

Adapt to the evolving pharmaceutical ecosystem with technology solutions that can help accelerate research and develop pipelines.

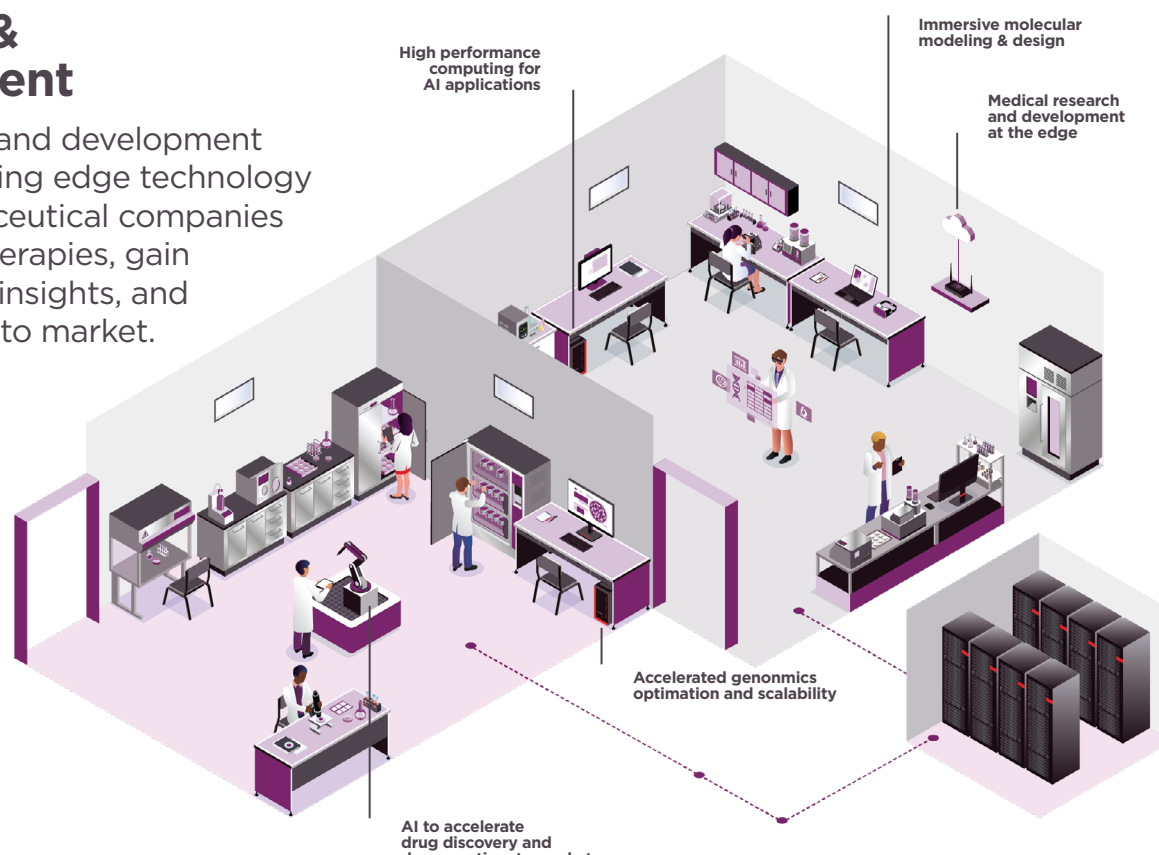

Lenovo

## Technology solutions for the entire pharmaceutical lifecycle

From research and development to clinical trials and manufacturing, Lenovo and Intel provide access to a unique ecosystem of experts, products, services, and knowledge. Equip your pharmaceutical and medical device teams with cutting edge technology to discover new therapies, gain faster time to insights, maintain manufacturing quality and safety standards, and deploy go-to-market launches.

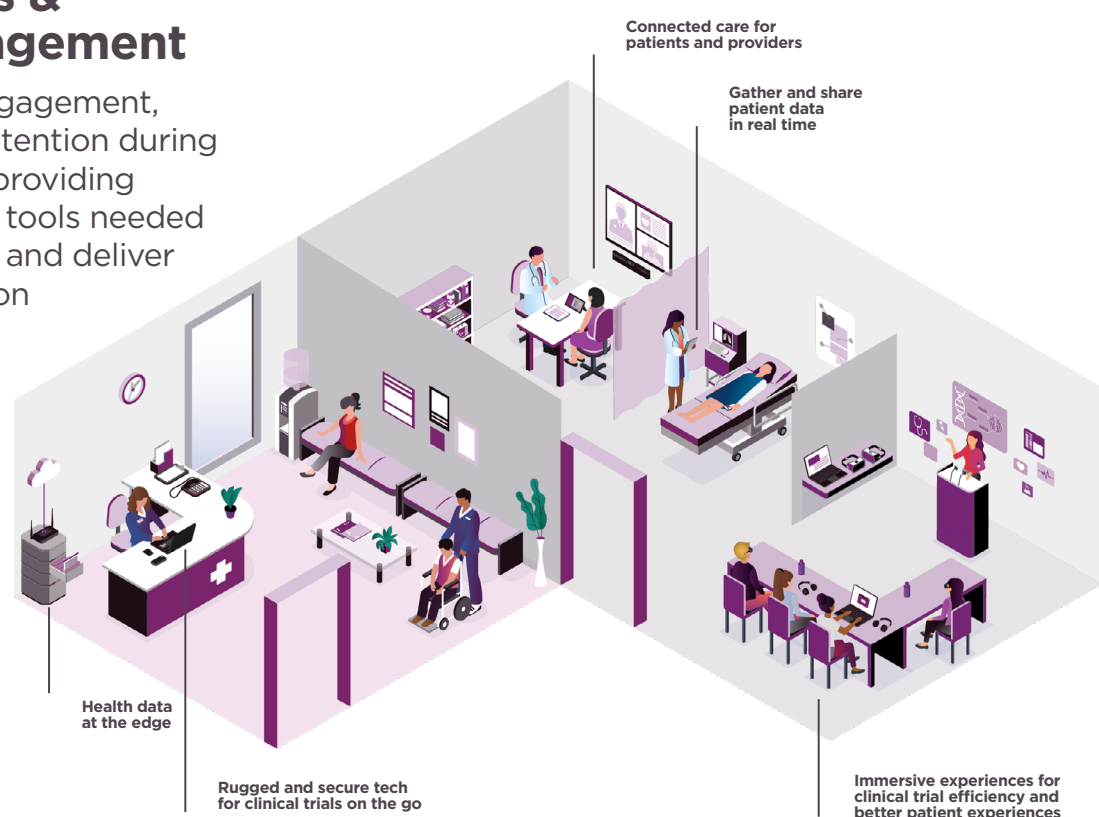

### 01 Research & Development

Equip research and development teams with cutting edge technology to help pharmaceutical companies discover new therapies, gain quicker time to insights, and accelerate time to market.

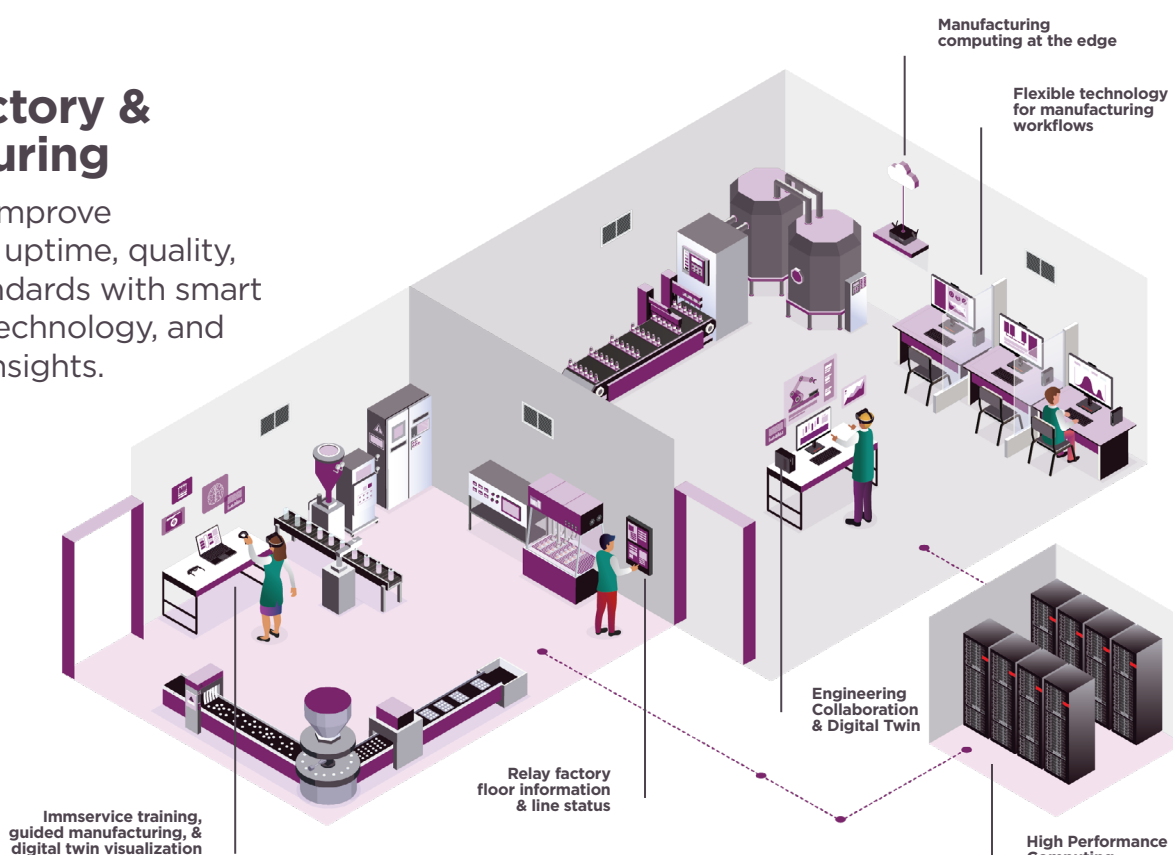

### 02 Clinical Trials & Patient Engagement

Improve patient engagement, experiences, and retention during clinical trials while providing research teams the tools needed to care for patients and deliver efficient feedback on treatment results.

### 03 Smart Factory & Manufacturing

Optimize and improve manufacturing uptime, quality, and safety standards with smart factory tools, technology, and leading edge insights.

### 04 Commercial Sales Teams

Deploy drug launches and go to market strategies by providing sales and marketing teams with on-the-go technologies to better facilitate meetings with physicians, pharmacy procurement, and patient services.

## How Lenovo powers digital healthcare

#### ThinkShield security

Protect proprietary information and patient data with security solutions from pocket to cloud.

#### TruScale IaaS and DaaS

Keep pharma competitive with the most up to date technology and infrastructure modernization.

#### Lenovo Premier Support Plus

Provide faster issue resolution, protect your investment, and prevent IT issues before they become problems.

#### Environmental commitment

Support your green ambitions with sustainable packaging and reduced emissions.
