Lenovo ThinkPad
Universal USB-C Smart Dock
ThinkSmart Edition

Turn your laptop into a meeting room solution.
Lenovo ThinkPad Universal USB-C Smart Dock ThinkSmart Edition is a better way to build out your BOYD rooms. Powered by Microsoft Azure Sphere IoT technology, this entry-level managed dock, streamlined with a single cable and mounting bracket, gives IT managers remote visibility into room status and utilization. Combining UC interoperability (Teams, Zoom, Webex, Google Meet, etc.) with plug-and-play flexibility, this smart dock allows users to connect their laptops to professional quality audiovisual devices and large format displays with one cable. Without complex setups or configurations, users get Hotdesk simplicity with full conference room perks. That's smarter.

An innovative cable management system keeps all peripheral cables out of the way and locked down.
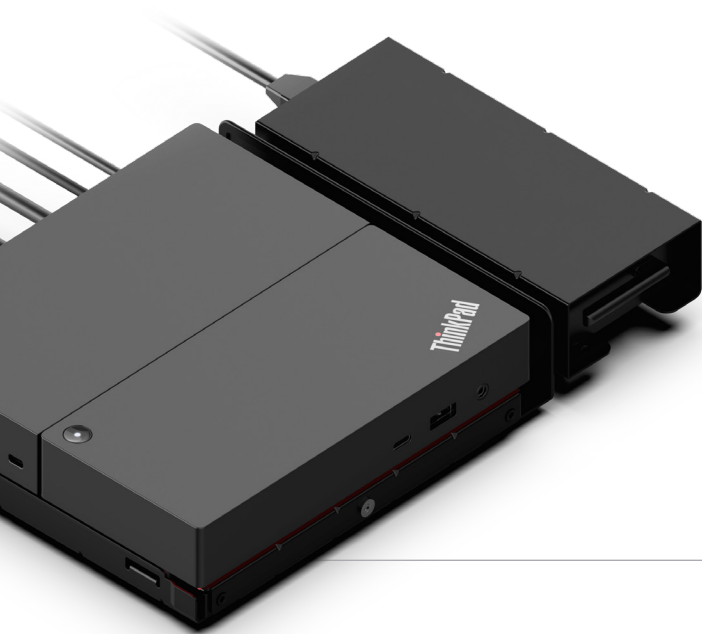

Lenovo ThinkPad Universal USB-C Smart Dock
ThinkSmart Edition

Optimize collaborative spaces.

This ThinkSmart dock is an entry-level managed solution that offers IT managers valuable room usage insights and other data analytics, facilitating better decision-making for future technology investments.

Get remote visibility and manageability capabilities with ThinkSmart Manager Basic.

Remotely assess room occupancy, device health, and peripheral usage.

Gather data on meeting environments to make informed decisions about device and workspace investments.

MULTIPLE UC POSSIBILITIES, ONE CABLE.
Get more from your meetings with maximum efficiency by adding professional audio and video peripherals using a single quick-release cable. Expand your creative potential with access to multiple 4K monitors and blazing-fast data transfers with USB-C and USB-A. Plus, get rapid-charging for your laptops up to 60W to always stay energized.

UNIVERSAL DOCK COMPATIBILITY.
Engineered to connect a single universal USB-C port, this docking solution empowers teams to effortlessly integrate their laptops with high-quality, professional in-room devices all while keeping wires and power adapter tucked away. With the ThinkSmart dock, enhance communication, streamline workflows, and foster productivity in every meeting.

SAVE TIME, EFFORT, AND WORRY.
Streamline the day-to-day management by gaining cloud-based visibility into the status of BYOD rooms equipped with a ThinkSmart dock. Its time-saving features let you update firmware and monitor docks remotely, without a physical PC connection. What's more, Microsoft Azure Sphere IoT is built into all our smart docks. This multi-layered cloud-based security solution provides continuous security updates, providing further protection and extra peace of mind.

Turn your peripherals into an easy-to-use—and easy-to-manage— meeting room space. With Lenovo ThinkPad Universal USB-C Smart Dock ThinkSmart Edition, BYOD collaboration just got smarter.
