Lenovo

Your AI PC future starts with Lenovo

AI is no longer a dream of the future. It's here, and it's transforming the way business is done today. As workforces rapidly discover new use cases for AI, they need an experience that meets the demands of emerging workloads. That's why Lenovo has developed the most comprehensive portfolio of AI-powered devices and services in the industry. And that starts with the **AI PC, powered by Intel® Core™ Ultra processor and Intel vPro®.**

Every **Lenovo AI PC** features dedicated hardware and optimized software tools that allow it to run certain workloads locally. As a result, AI PCs can help speed up AI performance, mitigate security gaps, and lower costs associated with cloud infrastructure.

The time to embrace AI's potential is now—and **choosing the right partner for the journey is essential.**

Support from the start for businesses of all sizes

Lenovo AI Services help you get to AI impact faster. With **AI Fast Start** and **AI Discover**, get from proof of concept to production in weeks, not months.

Lenovo Premier Support Plus keeps your devices running better, for longer. And with certified experts available 24/7, users are never on their own.

AI-capable PCs will make up around

60%

of all PCs shipped in 2027.¹

Lenovo

Lenovo ThinkBook 13x AI PC

With Lenovo's AI solutions powering your business, you can:

1

Help employees deliver their best work

With the right hardware behind it, AI can help your workforce not only breeze through the routine tasks that distract from larger goals, but also spark creativity and inspiration as they explore ideas that generate impactful business results.

2

Protect your most valuable assets

Lenovo's AI-powered cybersecurity suite helps ensure that innovation doesn't come at the cost of vulnerability.

3

Streamline IT operations

Stretched IT departments can customize their PC fleets to meet their manageability needs, helping to maximize available resources and reduce costs.

4

Partner with a trusted AI leader

Backed by years of experience, an industry-leading portfolio and a zero-trust supply chain, Lenovo is a partner you rely on.

Lenovo

Microsoft Copilot in Windows

Employees can innovate faster and easier with this AI companion, which is deeply integrated throughout **Windows 11 Pro**. **Microsoft Copilot** just needs a simple prompt to help workers complete routine tasks more efficiently and discover fresh solutions to complex problems.

68% of surveyed employees said Microsoft Copilot improved the quality of their work.² Overall, Windows 11 makes employees 15% more productive.³

1

Increase productivity

- Summarize long documents in a snap
- Easily analyze and visualize data
- Drag and drop images to search for information

2

Create engaging content faster

- Generate art and images with a few words
- Automatically build reports from Excel spreadsheets
- Improve email drafts and other writing projects

3

Get more done in fewer clicks

- Optimize workflows
- Interact with built-in Windows apps
- Blur background in videocalls
- Search Photos app
- Start a focus session

Intel® Core™ Ultra processor

Combining performance cores and efficiency cores for real-world multitasking performance, every Intel® Core™ Ultra processor features a dedicated **Neural Processing Unit (NPU)**.

Purpose-built and optimized to run AI workloads, the NPU ensures that the power of AI doesn't come at the expense of the performance and battery life employees need.

Inside Intel® Core™ Ultra's NPU

The NPU is the processing unit found within Intel® Core™ Ultra processor that is specifically optimized for AI workloads. What makes NPUs so special for AI?

Let's break it down:

- The **Intel® Core™ Ultra NPU** completes significantly more calculations per second when compared to traditional CPU cores.
- It's optimized for **large language models (LLMs)** and complex algorithms, so it can work more efficiently with less bottlenecking.
- With the NPU dedicated solely to AI tasks, **Intel® Core™ Ultra processor** can deliver smoother all-around performance and better battery life.

And the benefits of the **Intel® Core™ Ultra NPU** will only grow over time. Throughout 2024, Intel is working closely with more than 100 Independent Software Vendors (ISVs) to optimize more than 300 AI-specific features and applications for Intel® Core™ Ultra processors..

Lenovo

Smarter productivity tools for a better user experience

Customizable audio-visual enhancements and seamless smartphone integration keep your workforce productive.

Lenovo ThinkPad X1 Carbon AI PC

Intel® Unison™

Seamlessly connect your Lenovo AI PC with other devices, on Intel® Evo™ Edition:

- Send and receive calls and texts straight from your AI PC.
- View smartphone notifications.
- Quickly transfer files between devices.
- Automatically sync photo galleries.

Lenovo View

AI-powered webcam utility

Lenovo View's suite of AI-powered PCs leverages the Intel® Core™ Ultra NPU for an **improved webcam experience:**

- Always look good on camera (even in low light conditions).
- Prevent unwanted visitors from snooping with Privacy Alert and Privacy Guard.
- Stay front and center with Auto-framing.
- Maintain wellness with Posture Alert and 20-20-20 Eye Wellness.

Windows Studio Effects

In-camera effects studio

Windows Studio Effects utilizes Intel® Core™ Ultra's NPU to apply additional effects to the device camera or built-in microphone. **Supported effects include:**

- Background blur
- Eye contact
- Auto framing
- Voice focus
- Portrait light
- Creative filters
- Eye contact teleprompter

Lenovo

Protect your most valuable assets with AI

And with the **Lenovo ThinkPad X1 Carbon**, **ThinkPad X1 2-in-1** and **ThinkBook 13x** running more AI workloads on-device instead of the cloud, you can further minimize security gaps that bad actors exploit.

Lenovo ThinkShield gives you full control over your PC fleet with a comprehensive suite of advanced hardware- and software-based security features that utilize AI technologies to offer best-in-class protection against issues like IP leaks, data loss, and confidentiality breaches.

Key security offerings in our ThinkPad notebooks powered by Intel® Core™ Ultra processor and Intel vPro® include:

- AI-powered threat detection
- AI-enhanced biometric authentication
- AI-powered phishing detection
- Secure Boot, BIOS, and firmware protection
- Advanced encryption
- Customized, AI-managed security service solutions

Lenovo

Security that works above and below the OS to keep your fleet safe

Windows 11 is the most secure Windows ever

AI is at the heart of **Microsoft Windows 11 Pro**, helping to process more than 78 trillion malicious cybersecurity signals every day. This threat intelligence helps **Microsoft constantly improve Windows 11's out-of-the-box defense.**

58% drop in security-related incidents following Windows 11 Pro adoption.⁴

Unlock new AI experiences.

Lenovo recommends Windows 11 Pro for Business.

Keep your data safe with Microsoft Copilot

When employees are logged in with a **Microsoft Entra ID**, **Microsoft's Commercial Data Protection** ensures that Microsoft Copilot chats, searches, content, and other sensitive data will not be saved, viewed, or used to train AI models.

Unparalleled hardware security

Lenovo ThinkPads with **Intel vPro®** go below the OS to intelligently protect against sophisticated cyber threats:

- AI-powered threat detection monitors CPU telemetry for anomalous behavior.
- Firmware, BIOS, RAM, and TPM 2.0 protections built directly into the silicon.
- Hardware-accelerated virtualization and encryption.

Lenovo ThinkPad X1 2-in-1 AI PC

With **Lenovo ThinkShield**, **Microsoft Windows 11 Pro**, and **Intel vPro®** working in unison, **Lenovo AI PCs** are protected by defense in depth, making you less vulnerable to crippling cyberattacks.

Lenovo

Supercharge remote IT management with Windows Autopilot and Intel vPro®

While remote and hybrid workforces can leave IT departments stretched, the **Lenovo ThinkPad X1 Carbon** and **ThinkPad X1 2-in-1** deliver enterprise-grade solutions that make operations more efficient.

Unlock new AI experiences.

Lenovo recommends Windows 11 Pro for Business.

Organizations can deploy Windows 11 Pro PCs

25% faster.⁹

With **Windows Autopilot**, you can use cloud-based services to simplify device management for both IT and end users. Using cloud-based services, **Windows Autopilot**:

- Reduces the time IT spends on deploying, managing, and retiring devices.
- Reduces the infrastructure required to maintain the devices.

Lenovo AI PCs with Intel vPro® are also compatible with **Intel® Active Management Technology (Intel® AMT)** and **Intel® Endpoint Management Assistant (Intel® EMA) out of the box**:

- Intel AMT enables out-of-band access for remote devices, even if they're powered off.
- Intel EMA leverages the cloud to help IT admins access fleet PCs inside and outside corporate networks.
