

# An elevated PC experience

67% of enterprises are increasing investments in GenAI<sup>1</sup> — but will their users have the right PCs to fully leverage it?

The Lenovo ThinkPad® X9 Aura Edition Series, imagined with Intel, delivers an ultra-premium, enterprise-level user experience with next-gen AI capabilities.

## Increased performance + AI + elevated, exclusive experiences: A laptop for your most demanding users

Lenovo ThinkPad® X9 Aura Edition is the product of a years-long, exclusive agreement between Intel and Lenovo, representing the best personal computing technologies from both companies. For enterprises requiring the highest levels of AI performance, personalized experiences, military-grade durability, and executive-level support, Aura Edition laptops provide powerful capabilities in a stylish package.

## A laptop that's ready for anything

## The perfect travel companion

Your flight is departing 90 minutes late, so you grab a seat in a lounge and log into your computer to get a few things done. The Lenovo ThinkPad® X9 Aura Edition, powered by Intel® Core™ Ultra processors and Intel vPro® for individualized experiences, keeps you protected and productive, giving you the power to collaborate from anywhere and advanced security features for peace of mind.

## A smarter way of working

Laptops that maximize your productivity

Hover over the highlighted words to learn more

**Focus time at the click of a button**  
Attention Mode can do everything from **silencing alerts** to blocking distracting websites and apps, such as social media sites.

**Prioritize wellness**  
Reminders throughout the day let you know the best times to look away from the display to prevent eye fatigue. Wellness Mode sends notifications to **correct your posture** when needed, thanks to the magic of computer vision AI.

**No more fiddling with camera settings**  
Enhance audiovisual effects for videoconferencing with **Collaboration Mode**, regardless of the platform.

## Support when and how you need it

Smart Care with Lenovo Aura Edition reduces IT support and troubleshooting burdens by providing real-time Lenovo expertise. QR codes quickly identify devices and issues, and targeted drivers, firmware, and updates can be sent directly from Lenovo support.

The **Premier Support Suite** offers rapid, white-glove response to all queries.

## World-class technology, delivered on demand

Lenovo TruScale Device as a Service reduces capex and ensures your organization is always outfitted with the latest tech. From rollout to recovery, Lenovo has the experience and global reach to handle everything.

## A top performer for your top performers

The world's largest manufacturer of PCs, Lenovo has been a trusted partner to IT executives for four decades. The Lenovo ThinkPad® X9 Aura Edition Series, imagined with Intel, delivers AI PC experiences that are personalized, productive, and protected, with a best-in-class feature set and backed by industry-leading Lenovo support — an experience your most demanding users will love.
