Lenovo
AURA EDITION
imagined with Intel

Lenovo

A price performer for your high performers

The Lenovo ThinkPad® X9 Aura Edition Series, imagined with Intel, delivers an ultra-premium user experience with next-gen AI capabilities.

Increased performance + AI + elevated, exclusive experiences

40% of small businesses leverage generative AI — and adoption has nearly doubled over the past year.[1] For users requiring the highest levels of AI performance, an intuitive user experience, military-grade durability, and executive-level support, X9 Aura Edition laptops provide powerful capabilities in a stylish package.

Copilot+PC

The perfect travel companion

Your flight is departing 90 minutes late, so you grab a coffee, find a seat, and log into your computer to get a few things done. The Lenovo ThinkPad® X9 Aura Edition, powered by Intel® Core™ Ultra processors and Intel vPro®, ensures smooth, efficient performance to help you stay productive on the go.

Focus time at the click of a button
Attention Mode can do everything from silencing alerts to blocking distracting websites and apps, such as social media sites.

Prioritize wellness
Reminders throughout the day let you know the best times to look away from the display to prevent eye fatigue. Wellness Mode sends notifications to correct your posture when needed, thanks to the magic of computer vision AI.

Connected everything
Developed by Lenovo and powered by Intel® Unison™, Smart Share enables you to share files simply by tapping your phone to the side of your PC screen.

No more fiddling with camera settings
Enhance audiovisual effects for videoconferencing with Collaboration Mode, regardless of the platform.

Support when and how you need it

Smart Care with Lenovo Aura Edition reduces IT support and troubleshooting burdens by providing real-time Lenovo expertise. QR codes quickly identify devices and issues, and targeted drivers, firmware, and updates can be sent directly from Lenovo support.

The Premier Support Suite offers rapid, white-glove response to all queries.

World-class technology, delivered on demand

Enjoy Device as a Service options that reduce the up-front costs of new PCs and ensure your organization is always outfitted with the latest tech.
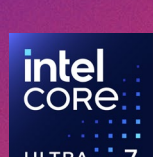

Next-gen AI PCs for the most demanding users

The Lenovo ThinkPad® Aura Edition Series, imagined with Intel, delivers AI PC experiences that are personalized, productive, and protected, with a best-in-class feature set and backed by industry-leading Lenovo support.
