

Esports lab management software and support

Control Access

Rest assured that SENET will control who gets access, what they can access, and when that happens.

Stay Ready

Your games and device patches are synced and updated so every station is ready when you need it.

Learn & Grow

Gather data on your esports operation and make strategic decisions to leverage more options. Every option is included for flexibility.

You run the program, SENET runs the arena

You want an arena that's **powerful**, **ready** and **safe**. Enestech's SENET does that work so you don't have to.

User Experience Features	IT Management Features
<ul style="list-style-type: none"> - Individual login experience - Reserve a PC or console - Share game licenses - Games/software limited based on user type - Multiple languages - Remote chat with help desk 	<ul style="list-style-type: none"> - Cloud solution - Manage multiple sites in one console - Reserve stations for classes/practices - Remote control of PCs - Local or diskless options - Automatic game updates - Reporting module

SENET Licensing Options

SENET can be locally installed on each PC or delivered diskless through a centralized SENET Boot server. Both options are included in the **SENET Premium License** so you can adjust as you need.

SENET Premium Licenses

# of Stations	Lenovo PN
1-20	4L41S07969
21-40	4L41S07971
41-60	4L41S07973
61-80	4L41S07975

Email esports@lenovo.com to discuss custom needs.

SENET Premium Daily Support is a premium add-on, leveraging the expertise and 24/7 availability of Enestech's team to handle everyday tasks so you don't have to, including game installs, updates and customization.
