

Lenovo 300w Gen 5

Transforming from laptop to tablet to tent with a sturdy 360-degree hinge, the Lenovo 300w Gen 5 is the ideal tool to help K-12 students succeed. Powered by the Intel® Processor N150 or N250 for easy multitasking, this 11.6" 2-in-1 provides all-day battery life and robust dual storage. Innovative features elevate the user experience, including Lenovo Pencil Touch that transforms a No. 2 pencil into a stylus and the new AI-enhanced mic to improve audio quality for online classes and video conferencing. Offering holistic security integrating hardware, firmware, and software, this secured-core PC protects against sophisticated attacks. Plus, easy-maintenance elements like the CRU battery and anywhere connectivity with up to Intel® Wi-Fi 7 (5 Gig) make this robust convertible built for modern learning.

Students can be rough on their devices, so the Lenovo 300w Gen 5 is built for durability. Meeting Lenovo DuraSpec standards, this 2-in-1 withstands spills up to 360ml, drops onto concrete from desk height, and A-cover pressure of up to 60 kg. With tough-as-nails Corning® Gorilla® Glass, the touch display resists scratches and cracks. Lenovo has also added a hardened USB-C port to reduce the risk of accidental damage and costly repairs. Plus, the copper heat pipe for added thermal capacity, D-cover rubber feet that can't be peeled off, and full-skirted keycaps, make this 2-in-1 a number one choice for any student.

Committed to sustainability

At Lenovo, we're focused on providing smarter technology that builds a brighter, more sustainable future for our customers, colleagues, communities, and the planet. We're determined to build a smarter future for all through the products and services we offer. And we partner with Intel, the industry leader in sustainable semiconductor manufacturing.

As an extension of our drive for sustainability and circular use of our packaging, the Lenovo 300w Gen 5 is part of our "Turning Waste into Educational Wonder" project, which cultivates interest in STEM fields using everyday household materials and packaging. By engaging students and teachers to use STEM principles for design, engineering, and problem-solving, we hope to instill a culture of curiosity, creativity, and resource conservation.
