

Inspiring the future of the built environment with AI

Lenovo

Technology solutions for BIM 2.0

As the AEC industry advances, new workflows have emerged to help architects, designers, engineers, and building owners extend the potential of Building Information Modeling (BIM). From AI-assisted automation, generative design, and visualization to high-performance computing like reality capture and CAE simulation, BIM has evolved from documentation to a digital twin. These workflows require Lenovo Workstations with NVIDIA RTX™ Ada Generation GPUs.

Design

AI-driven tools and advanced workstations have transformed design workflows, enabling rapid concept development, optimal generative design, and photorealistic visualization—all of which push the boundaries of architectural innovation.

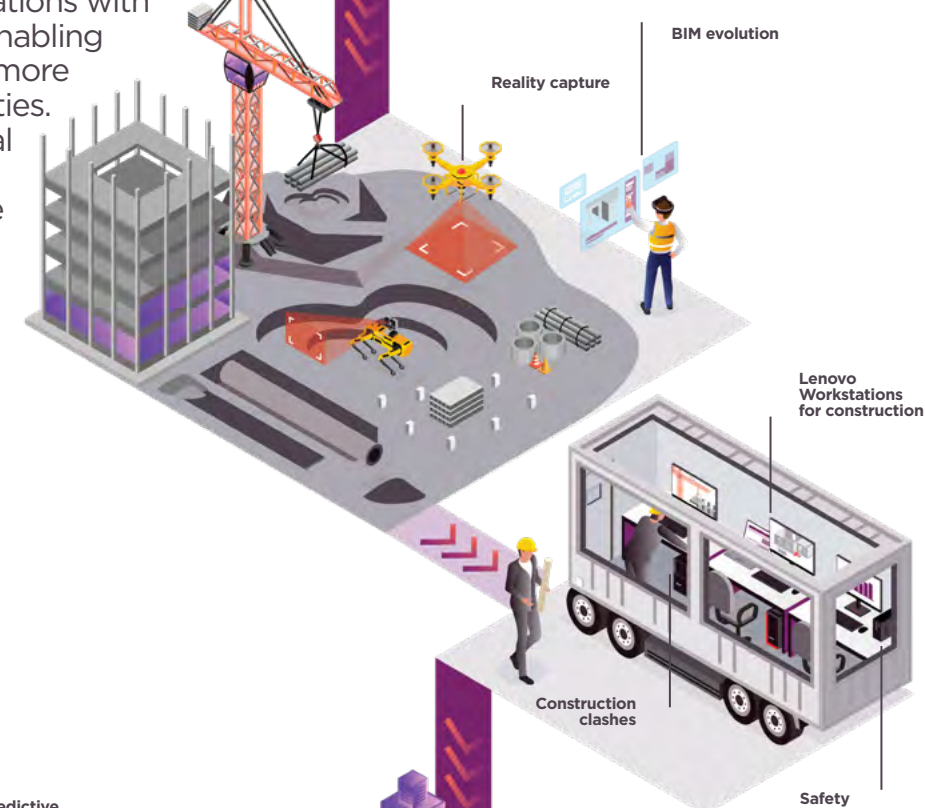

01

Construction

AI is transforming building operations with tools like NVIDIA Omniverse™, enabling real-time optimization for safer, more secure, and highly efficient facilities. As BIM models evolve into digital twins, contractors leverage AI-enabled workflows to streamline efficiency, detect construction clashes, reduce waste, and achieve better design and environmental outcomes.

02

Operations

AI is transforming building operations with tools like Omniverse, enabling real-time management and optimization, and ensuring facilities are safer, more secure, and highly efficient.

03

How Lenovo & NVIDIA® power AI in AEC

AI devices and infrastructure

Build a sustainable AI foundation with scalable, powerful, and energy-efficient workstations.

Sustainable AI with Neptune™ Liquid Cooling

Optimize performance and efficiency with advanced liquid cooling for demanding AI tasks.

Lenovo AI Innovators program & AI services

Collaborate with AI partners to develop, deploy, and scale solutions using cutting-edge tools.

ThinkShield security

Safeguard devices with comprehensive security, from component-level protection to cloud security.

AI center of excellence & responsible AI

Accelerate AI adoption with expertise, workshops, and responsible AI ensuring ethical solutions.

AI innovation with NVIDIA®

NVIDIA® drives AI with powerful GPUs and platforms that accelerate deep learning, machine learning, and data science.
